Guilherme Mota

FullStack Developer | NextJs | React | Angular | NodeJs | Typescript
| Java
Porto Velho, Rondônia, Brazil

Summary

I am currently studying Systems Analysis and Development. I enjoy both frontend and backend areas, so I am always looking to acquire more knowledge to specialize in fullstack development.

I am communicative and always willing to learn and face new challenges, bringing effective and consistent solutions to solve them.

I like to keep myself busy with various personal projects. Through these projects, I have gained knowledge and experience with email integration, GitHub integration, login with tokens and refresh tokens, WebSockets, and the use of APIs, among others, using NodeJs, React, and the NextJs framework. I have also utilized PostgreSQL, MySQL, and MongoDB databases in my projects.

I have knowledge in Java, NodeJs, TypeScript, HTML, CSS, NextJs, React, Angular, Tailwind, Git, and Databases.

Experience

Ministério Público do Estado de Rondônia
Volunteer Intern
October 2023 - Present (8 months)
Rondônia, Brazil

During the internship, I created features and carried out code maintenance in the backend of the company's systems, including the implementation of tokens and refresh tokens and the integration with Microsoft Teams chat in the MeNotifica system.

On the frontend, I performed bug fixes and page styling, including the implementation of the dark theme for the Cabinet system (PJe integrator).

Furthermore, I learned good coding practices, the use of Git and Scrum during project development.

The systems I performed maintenance on are in Java and Angular.
